Copy Horizon Fellows Program

Form Title

Are you interested in being considered for the Horizon Fellows Program?*

(Maximum 500 words)

***Briefly explain why you are interested in being considered for the Horizon Fellows Program.**

Your response can address any of the following questions: How would you benefit from the program? What would you want to accomplish during

Horizon Fellows Program

Yes

The Horizon Fellows Program represents an exceptional opportunity to refine my research, teaching, and interdisciplinary expertise, preparing me not only for a PhD but also for a diverse career that bridges academia and other intellectually demanding fields. My academic background, research focus, and professional experiences align closely with the program's objectives, and I am confident that participating would be transformative for my development.

Research Focus and Goals:

I am currently pursuing two main research projects: the Categorical Foundations of Structuralism, which applies Category Theory to philosophical questions, and my forthcoming Master's thesis on Translation Theory, addressing theories of truth. These projects highlight my ability to integrate advanced methods from mathematical logic, set theory, and model theory into philosophical inquiries.

Professional Experience and Skills:

At Futura, a leading EduTech company, I progressed from one-to-one tutoring in mathematics and physics to teaching large classes of 250–500 students in a Mathematics and Logic course. This role, supported by in-house AI tools, introduced me to innovative instructional methods and gave me practical expertise in applying AI to education.

This experience honed my ability to convey complex concepts to diverse audiences, develop tailored teaching materials, and leverage technology for effective learning. Beyond these practical skills, I gained insights into AI's foundational structures, deepened by my academic background in mathematical philosophy and logic. These combined experiences make me uniquely positioned to integrate research, teaching, and technology in ways that align with the program's objectives.

Interdisciplinary Aspirations and Career Goals:

The Horizon Fellows Program aligns perfectly with my interdisciplinary ambitions. I aim to build on my expertise in philosophy and mathematics while exploring adjacent fields, such as physics and computer science. For example, acquiring foundational knowledge in physics would complement my interest in the philosophy of physics, while studying complexity theory in computer science would enrich my work on computability and its implications for AI.

The program's emphasis on academic training and mentorship would also support my career goals. While I am committed to pursuing a PhD, I remain open to opportunities in teaching, research, and industry. My dual expertise in AI's theoretical underpinnings and practical applications makes me well-suited for roles that demand a combination of intellectual rigor and technical skill.

Horizon Fellows Program (continued)

In summary, the Horizon Fellows Program offers a unique platform to deepen my expertise, refine my teaching and research abilities, and explore interdisciplinary connections. It is an essential step toward achieving my academic and professional aspirations while equipping me to contribute meaningfully to a range of fields.

Graduate #1

Institution	University of Amsterdam (920001912)
Dates of Attendance	09/2024 - 08/2025
Location	Amsterdam, Netherlands
Degree	Master of Science: 08/2025
Major	Mathematics
Major 2	Philosophy
Minor	No Minor
GPA	4 / 4
Degree Status	In Progress

Undergraduate #1

Institution	Ludwig Maximillian University (920001021)
Dates of Attendance	10/2023 - 08/2024
Location	Munich, Germany
Degree	Bachelor of Science: 08/2025
Major	Mathematics
Minor	Philosophy
Degree Status	In Progress

Undergraduate #2

Institution	Ludwig Maximillian University (920001021)
Dates of Attendance	10/2023 - 08/2024
Location	Munich, Germany
Degree	Bachelor of Arts: 08/2024
Major	Philosophy
Minor	Mathematics
Degree Status	Complete

Undergraduate #3

Institution	Universitat Konstanz (960049504)
Dates of Attendance	10/2022 - 08/2023
Location	Konstanz, Germany
Degree	No Degree Awarded or Expected
Major	Philosophy
Major 2	Mathematics
Degree Status	Complete

Are you applying for an application fee waiver?* Yes

Fee Waiver Request

Type of fee waiver - select one* Financial Hardship

Financial Hardship

Select one: Other personal financial situation

Briefly describe the special circumstances which make payment of the application fee a financial hardship for you.*(Min character limit = 50 Max character limit = 500)
I live alone in Amsterdam, one of Europe's most expensive cities, where high rent and living costs, combined with the high tuition fees of my Master's programme, create significant financial pressure. I work alongside my studies to cover these expenses, with most of my income going toward essentials like rent, tuition, and living costs.
